

MIST as the First Responder to Produce Hand Sanitizer to Fight COVID-19 Crisis

With the wholehearted effort and support of all military students, faculty and staffs, MIST launched its first initiative with the leading role of Biomedical Engineering Department to produce Hand Sanitizer to fight ongoing COVID-19. Pandemic in the country. By the first week of April 2020, MIST produced nearly 1, 00,000 bottles of Hand Sanitizer and distributed across the country mainly to the marginalized and floating people, health workers, security personnel and service providers through Bangladesh Army deployed in the field. In addition, MIST also rendered its support to provide Hand Sanitizer to Kuwait Government.
